Just saw that David Gray will be meeting with Sterigenics on March 9<sup>th</sup>. At this point, not sure we'll be invited. Aimee pulled these permits on the Grand Prairie facility and I think you already had info on the Santa Teresa facility. I think we also looked at another facility in the Fort Worth area that was using other sterilization processes such as gamma sterilization process. I'm assuming we'll be asked to pull together a We Care that outlines what we know about the facilities EtO use, emissions, and emission controls in place where EtO is used. I would also put in a sentence indicated other sterilization techniques being used at other facilities in the Region. Probably need to have the WE CARE prepared by COB on Friday. Please let me know if we need to discuss.

Jeff,

Attached are the files for the most recent permit action for Sterigenics. They have this one NSR permit – no title V permit.

Aimee
